Allowable Subject Matter

1. **Claims 1-3, and 6-14** allowed.
2. The following is an examiner's statement of reasons for allowance:
3. **Claims 1, 13 and 14** are allowed because the closest prior art, Mazzola (US Patent 5,278,834) in view of V.C. Hamacher et al., Computer Organization, 2d ed. 1984, pages 1-9 (hereinafter "Hamacher"). , fails to anticipate or render obvious the concept of efficiently processing single-cell PDUs, reducing the number of memory accesses associated with link list maintenance by determining for a given pdu received by the processor if single cell pdu and storing information characterizing the single-cell pdu to the internal memory, in combination with all other limitations in the claim (s) as defined by applicant.

Mazzola discloses a system that manages memory used by communication task of a communication network; buffers are used to pass data to a source node, but do not have a first memory internal to the processor.

Hamacher discloses a internal memory to the processor, high speed storage registers, but does not store information characterizing single-cell pdus or not a single-cell pdu.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
